

Premium+

Your plus in performance for water-jet cutting

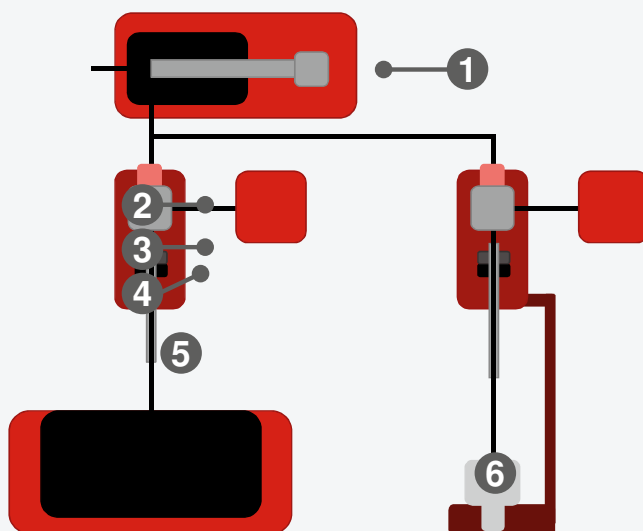

Precise cutting processes – tailor-made for you

Premium+ focusing tubes are ideal for **demanding cutting applications**, no matter whether exotic or easily machinable materials, composite materials, split cuts or high-precision cuts.

With its exceptional quality features, Premium+ sets new standards for water-jet cutting. See for yourself today the added benefits in terms of application solutions.

Long tool life and reliability of the focusing tube keep machine downtime to a minimum. This is just the way to guarantee maximum productivity and cut costs.

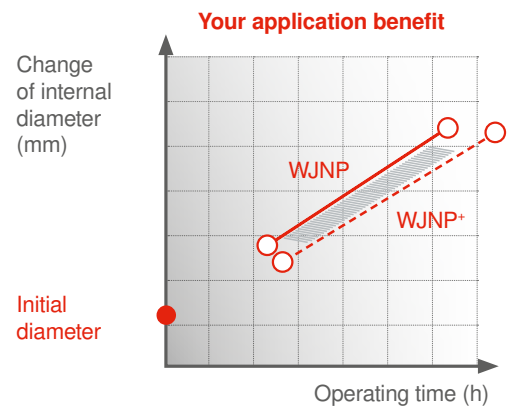

You can trust our expertise for any application level:

- 1) Plungers
- 2) Mixing chamber inserts
- 3) Sealing rings
- 4) Brass rings
- 5) Focusing tubes
- 6) Catcher cups

+ Economic benefits

- ▲ Optimised wear protection ensures **longer tool life**.
- ▲ Increased tool life supports **improved machine utilisation**.
- ▲ Maximum material quality and perfect processing **offer up to 30% improvement in performance**.

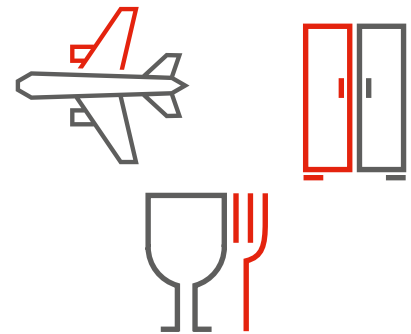

+ Your all-round package with no worries

- ▲ As a full-range supplier, we offer nozzles ready for use.
- ▲ You can choose from our **standard range** or ask for an individually customised **geometry**.
- ▲ We also produce plungers, mixing chambers and catcher cups according to your requirements.

+ For your cutting application and industry

- ▲ Whether for demanding or easily machinable materials, split cuts or precision cuts – Premium+ is just what you need **for your specific application and industry**.
- ▲ From food and furniture to the aerospace industry – we offer just what you are looking for: the solution for you.
